

ABOUT MASTT2040

- The **project** strives to enhance cross-sector collaboration within the manufacturing industry, promoting **co-creation between Manufacturing as a Service (MaaS) and Circular Economy** communities for a unified plan.
- Its ambition is to transform the vast knowledge of the manufacturing sector into an **actionable plan** contributing to the goals of the **EU Industrial Strategy** and recognizing the **MaaS approach** as one of the measures to foster the twin transition.
- The Consortium combines the expertise of **6 partners** from 5 countries: **2 industrial cluster associations, 1 governmental agency, 1 private research and technology transfer organisation, and 2 SMEs.**

WHAT IS STRATEGIC FORESIGHT?

Foresight encompasses a spectrum of approaches, strategies, tools, and methodologies that assist organisations in actively **examining, shaping, and navigating the future.** This involves grasping key factors driving change, envisioning potential future scenarios, and assessing how these changes might impact specific businesses, projects, or contexts. **Foresight methods** range from **technology roadmapping** and **Delphi surveys**, to **brainstormings** and **prototyping.**

FROM VISION TO REALITY: SHAPING MANUFACTURING 2040 TOGETHER

WHAT WE WANT TO DO

By using **strategic foresight methods**, we explore key trends, opportunities and potential disruptions shaping the future of the EU's manufacturing sector all the way to 2040.

The insights gained will empower informed decision-making, crafting effective strategies, and taking concrete actions to propel the EU's Manufacturing industry.

OUR ACTIVITIES

 UNTIL DECEMBER 2024

 ONLINE & IN BRUSSELS

ONLINE SURVEY

Assessing trends and their ability to foster MaaS vs. centralized manufacturing & twin transition

ONLINE WORKSHOP

Identifying trends, hypertrends and antitrends that affect manufacturing sector

DELPHI STUDY

Delphi study aimed at selecting the trends' probability & influence on the twin transition

SCENARIO WORKSHOP

Drafting scenarios and defining future use cases of MaaS, in Brussels at EDIH on 25-27 Nov. 2024

YOUR PARTICIPATION IS CRUCIAL!

- Understand the environment where MaaS stakeholders operate
- Connect the foresight perspective with day-to-day activities
- Advise the European Commission on how to shape the future of MaaS
